

Position: Senior QA

Dept: Software

Reporting line: Product Owner/ Tech leader

Starting date: ASAP

OUR COMPANY

Founded in 2000, Linagora is now positioned as the French leader in Free Software. We are present on four continents with around hundred clients. We develop innovative software, and advice and support our clients in their efforts to implement Open Source Solutions.

We are a key player in French and European digital sovereignty. Our DNA Innovation, openness, sharing and respect for citizens, are the DNA of LINAGORA. Our experts transmit their culture of Free Software not only to other companies and professionals in the sector.

OUR COMMITMENT

Trust by design and GoodTechForGood

Managerial change based on trust. "Trust by Design" promotes initiative, increases accountability, and reduces barriers to project progress.

Mission to put people, society and the planet at the center of its strategy and concerns. We are also making a commitment to become a carbon-neutral company by 2025 and giving ourselves the goal of offsetting all our CO2 emissions, since inception, by 2030. These are major changes.

Have a strong impact on the Free Software communities

LINAGORA is alongside many associations and initiatives promoting Free Software in France. We are in all the events, in contact with the communities.

OUR MISSION

"Inventing and developing ethical Free and Open Source Software to participate in changing the World with maximum positive impacts for humans, for society and for the planet."

- Alexandre Zapolsky - Chairman and Co-Founder

RESPONSIBILITIES

Technologies: Docker, MongoDB, Node (Typescript), React, Cassandra, Elastic Search, Flutter
